EXPERIENCE

Service Desk | **Jewel-Osco**, Chicago, IL **August 2023 – Present**

- Supervise service desk employees during shifts, assigning tasks and making sure customers are covered.
- Lead closing procedures for the service desk, including counting and reconciling cash drawers, restocking, and preparing the desk for opening.
- Train and mentor new team members on desk procedures and point-of-sale operations.
- Resolve customer issues and complaints, working through problems until they are settled.
- Process payments, returns, and exchanges accurately on the point-of-sale system.

PROJECTS

J.A.R.V.I.S. Voice Assistant | Python, Ollama, Whisper, Claude API, Spotify API, Cloudflare Workers **In Progress**

- Built a voice-activated Windows desktop assistant in Python that responds to a wake phrase and handles 10 types of requests, including finding files, launching apps, arranging windows, web search, calendar events, and reminders.
- Designed a privacy-first speech pipeline that runs entirely on-device, using openWakeWord for wake detection, Whisper for speech-to-text, Piper for text-to-speech, and a local Qwen3 8B model through Ollama, with an option to switch to the Claude API.
- Integrated the Spotify Web API through OAuth for music control, and built a Discord bot on Cloudflare Workers (JavaScript) that delivers reminders even while the PC is off.
- Shipped an auto-updater that installs new releases from GitHub, screen analysis with a local vision model, and 3 themes that each change the name, wake phrase, personality, voice, and look.

Radial Karambit Illustration | Illustration Final Project, Adobe Illustrator

- Conceived and designed a self-directed final project in Adobe Illustrator: a radial composition of 10 karambit knives arranged in a pinwheel so every blade spirals into a single center point.
- Gave each blade its own color scheme built from layered tonal bands, with matching textured grips and finger rings, keeping detail consistent across all 10 repeated forms.
- Delivered the vector artwork as a print-ready 11" x 8.5" piece that met the project's print specifications.

EDUCATION

Dominican University, River Forest, IL **Expected May 2027**

Major: Computer Science | *Minor: Graphic Design*

Relevant Coursework: Data Structures, Algorithm Analysis and Design, Operating Systems, Database Design and Programming, Artificial Intelligence, Front-End Web Development, Back-End Web Development, Windows-Based Application Development

LANGUAGES & TECHNOLOGIES

Languages: Java, Python, C#, JavaScript, SQL, HTML, CSS

Tools: Visual Studio 2022, Visual Studio Code, Eclipse, Google Colab, Ollama, GitHub, FileZilla

Design: Adobe Photoshop, Illustrator, InDesign
